ACKNOWLEDGEMENTS

I would like to express my deep and sincere gratitude to my supervisor (Assist. Prof. Dr. Ronak Taher Ali) for her continuous support and patience throughout my thesis study.

My truthful thanks are extended to Erbil Polytechnic University and the Deanery of Erbil Health and Medical Technical College for providing this opportunity to complete higher study and offering all requirements necessary to prepare this thesis.

Most importantly, none of this would have been possible without Head of Physiotherapy Department (Dr. Mahdi Khaled Qadir) and my very special thanks goes to him.
